PROJECTS/WORKS

Salary Management

The project is focused on developing a system to calculate an employee's salary based on their pay rate. This system can be implemented as a simple console application, a web application, or even as a feature within a larger HR software. The key objective is to automate the salary computation process, ensuring accuracy and efficiency.

Grade Management

Georgia Lautu Baptist Church
 https://www.georgialautubaptistchurch.org/

Designed my first website using Wix.com, showcasing my skills in web development, content creation, and design. Gained hands-on experience with Wix's platform, including layout customization, SEO optimization, and interactive elements to enhance user experience.

EXTRACURRICULAR ACTIVITIES & VOLUNTEER EXPERIENCE

Media Team Director
Georgia Lautu Baptist Church | Snellville, GA   2016 - Present

I manage the social media platforms for Georgia Lautu Baptist Church and am responsible for overseeing our digital presence. This includes maintaining and updating the organization's website, which I designed and developed using Wix.com. My role involves ensuring that our online communication aligns with the church's mission, engaging with our community through various platforms, and enhancing the overall digital experience for our members and visitors.
